WORLD'S POULTRY SCIENCE JOURNAL

Index of Titles

Volumes 22—25 (1966–69)

(Index for Volumes 1—21, may be found on pages 369—383, Vol. 22, 1966)

Figures in parenthesis indicate Volume number, others Page number

Acid-base imbalance, (22) 340
Agriculture in developing countries, (24) 117
Air filters, disposable, (22) 158
Air hygiene, glass fiber ceiling, (24) 319
Air movement, on growth rate, (25) 57
Alkaline phosphatase—
  genetic variations, (22) 45
  in serum, (22) 336
Ammonia from organisms in alimentary canal, (25) 56
Animal breeding practices, (22) 201
Animal wastes, symposium, (22) 39
Antibiotics, in broiler feeds, (24) 309
  and vitamins in broiler rations, (23) 56
Artificial insemination—
  effect of inosine, (24) 62
  immunization of hen, (22) 240
  of pheasants, (22) 240
  semen storage, (23) 111
  serology, (22) 234
  effect of inosine on, (25) 380
Atherosclerosis—
  effect of exercise, (22) 348
  on enzymes, (22) 342
Avian behaviour research in U.K., (25) 135
Avian monocytosis, (25) 218
Avian olfaction, (22) 346
Avian physiology, (22) 329
Avian tumours—
  nucleic acids of, (22) 344
  viruses, (22) 343; (24) 18
Award—
  Australian, (22) 50; (23) 258
  B.O.C.M. poultry science, (24) 247
  to Gustave F. Heuser, (23) 164

Behaviour—
  imprinting, (25) 147
  in laying cages, (25) 145
  while drinking, (25) 144
Bile acids of the chick, (24) 325
Blake, R. C. (23) 163
Blastodiscs of hens' eggs, (23) 54
Blood groups in turkeys, (22) 46
Blood cells, binucleated, in turkeys, (22) 44
Blount, W. P., (24) 313
Body weight selection in Coturnix, (22) 44
Breeding, (22) 40
  linecross, Finland, (24) 244
  results of selection, (24) 37
Breeders' conference—
  Australia, (23) 19
Broilers—
  age and value, (25) 64
  large from small hens, (25) 140
  leg weaknesses, (25) 253
  slaughter weight and quality, (23) 58
Broiler industry of Greece, (23) 315
Broiler rations—
  virginianmycin and furazolidone, (23) 253
Bursa of Fabricius, (22) 25
  and homograft rejection, (22) 344
  and thymus, (22) 337
  immunoglobulin production, (22) 339
  influence on lymphocytes, (22) 346
Bursaless chicks, antibody production, (22) 341

Cage floor design and shell quality, (25) 145
Cage size and number of layers, (25) 145
Cages layers—
  nutrition of, (22) 157
Calcium in ration, shell quality, (22) 158
Card index—
  information storage and retrieval, (23) 255
Cassava meal—
  energy in, (22) 236
Cellulose produce and agar-agar powder, (25) 385
Chick growth—
  yolk fraction, (22) 348
Chick hatching muscle, (25) 54
Chromium—
  dietary, on chicks, (22) 235
Coccidiosis, and coccidiostats, (23) 237
Colon—
  electrolyte conserving function, (24) 325
Color of hens—
  somatic hybridization, (24) 148
Comb growth—

effect of steroid esters, (24) 328
Conservation of germ plasm, (22) 151
Cottonseed meal, (22) 86
Coturnix (quail)—
cloacal gland, (24) 64
debeaking, (24) 58
ground chicory root in diet, (25) 51
hormone effects on oviduct, (24) 327
inbreeding of, (22) 46
response to sarcoma virus, (24) 241
selection for body weight, (22) 44
X domestic fowl crosses, (22) 44
Zinc deficiency on alkaline phosphate, (24) 329
Cytoplasmic transmission of melanin, (23) 50
Czechoslovak Branch Symposium, (25) 350

Daylength—
failure to control, (24) 317
Dietary energy and protein levels, (25) 380
Disease—
and egg production, (24) 315
Disease resistance—
selection for, (22) 99; (25) 112
Disease spread—
airborne, (22) 155
Distillers feed research, (22) 328
Duck hemoglobins—
folic acid, (22) 336
E. coli, (24) 141
Egg commission—
international, (22) 139

Egg production, (22) 329
factors effecting, (25) 239
protein levels for, (22) 155
recording apparatus, (23) 231
digestion, affect on performance, (25) 381
Egg quality—
breed differences, (25) 60
genotyoe-environment interactions, (23) 57
Egg shell—
avian, (22) 330
calcification, carbonic anhydrase, (23) 56
formation, acid-base balance, (24) 200
mucopolysaccharides, (23) 56
quality and ration, (22) 158
strength, (22) 156
Egg white—
available amino acids, (25) 52
Egg yolk—
carotinoid pigment, (22) 338
Eggs—
1964 world market, (22) 51
quality before and after pause, (23) 55
sulfonamides in, (23) 55
transportation and quality, (23) 55
Embryo—
effect of cobalamin acids, (24) 323
requirement for phelylalanine and tyrosine, (24) 331
testosterone on precipitin formation, (24) 327
Encephalomacia—
nutritional effects, (23) 133, 216
vitamin E, (23) 61
Endocrine studies using birds, (24) 128
Environment and disease resistance, (22) 299
Environment of the fowl, (25) 99
Estrogenic hyperlipemia, (22) 347
Estrogens—
on Newcastle disease, (22) 347

F.A.O. Meeting—
poultry production, (22) 146
F.A.S.E.B. Abstracts, (25) 355
Fattening—
broilers, (24) 336
hens, (23) 57
Fecundation—
polyspermy, (24) 148
Flavor—
factors affecting poultry meat and eggs, (25) 331
Flight—
telemetry of physiology, (22) 341
Flavoprotein—
inherited absence, (22) 43

Gene conservation, (22) 151
Genes affecting melanin pigmentation, (25) 6
Genetic improvement—
New Hampshire chickens, (25) 55
Genetic load—
influence of selection, (22) 45
Genetic muscular dystrophy, (24) 324
Genetics—
of laying performance, (22) 239
of nutrient requirements, (22) 299
regional research in U.S.A., (24) 300
serum proteins, (22) 237
Geese—
fattening, alkalization of water, (25) 52
feed mixtures for fattening, (25) 52
frequency of feeding, (25) 52
nutrition for growth, (24) 236
Goose livers—
fatty acid composition, (25) 51
Goslings—
fed diet without animal protein, (24) 338

Grower Diet—
studies on, for meat-type pullets, (25) 384
Growth inhibition—
heart extract, (22) 338
Growth and fattening of chickens, (25) 52

Haemorrhage in newly-hatched chicks, (25) 382
Hatching time and sex ratio, (24) 65; (25) 58
Hatcheries—
native Egyptian, (23) 336
Hormones—
calcium absorption, (22) 337
and egg production, (24) 147
Housing to prevent disease spread, (22) 155

Immunological competence—
development of, (24) 326
Immunoglobulins, (22) 341
Inbreeding in coturnix, (22) 46
Incubation at high altitudes, (23) 346
Iodine—
retention, (22) 339

Laying hens—
environmental temperature, (22) 126
sources of energy for, (22) 157
Laying flock sizes—
England, (24) 7
Leucosis—
breeding for resistance, (24) 107
detecting viruses, (23) 255
role of bursa, (22) 338
Light intensity—
growing pullets, (22) 156
for growth and eggs, (23) 246
Light programs for pullets, (23) 326
Light proofing houses, (24) 318
Litter—
comparative studies, (25) 64
Liver phosphates in the chick, (24) 324
Lysine—
low levels to chicks, (24) 320
urinary excretion of ornithine, (24) 320
strain differences in requirement, (24) 317
Lysozymes—
bio- and immuno-chemistry, (24) 322

Macdougall—
Major Ian, (24) 104
Marek's disease, (25) 35
agar gel diffusion test for, (24) 316
Meat—
bruising of poultry, (22) 316
evaluation, broilers, (22) 239
tenderness, (23) 6
versus bone estimations, (23) 57
Meat processing handbook, (22) 159
Meat production—
new approach in Moroccan rural areas, (25) 327
Mites in poultry houses, (25) 145
Moroccan chick trade in 1967, (24) 243
Moulting—
forced in spring, (24) 337
Muscle changes during growth, (24) 337
Myoglobin synthesis—
antibody study, (24) 321
Newcastle disease—
exposure to cold, (24) 330
virus nucleocapsid, (25) 54

Nitrofurans—
quail growth, (22) 237
Nutrient requirements—
genetics of, (22) 290
Nutrition—
absorption of radio-selenium, (24) 324
acid-base balance and calcium, (24) 321
amino-acid requirements of baby chicks, (25) 347
ammonium phosphate, (23) 253
antiperotic factor in fish oil, (24) 321
ascorbic acid, vitamin D_3, (22) 348
availability of iron, (24) 326
barley in laying diets, (25) 147
barley rations, effect of cellulase, (23) 60
broiler growth, effect of gross protein value (25) 349
Ca-P ratios for broilers, (24) 62
calcium hunger, (25) 144
calcium versus strontium, (22) 337
carnohydrate requirements, (23) 20
carbohydrate free diets, (24) 322
citric or tartaric acid, (24) 336
corn-soya laying rations, (24) 62
copper and collagen formation, (24) 327
cottonseed meal, (22) 86
crude fiber for layers, (24) 61
cyclopropenoid fatty acids, males, (22) 345
dietary K deficiency, (22) 344
dietary levels of choline, in hens, (24) 330
effect of environmental temperature, (24) 333
energy, (22) 6
excess iodine, (22) 335
exogenous bile steriole, (24) 327
fatty acid composition, (25) 53

Nutrition—*cont.*
fatty acids, influence on egg size, (25) 347
feed restriction, (24) 332
feed restriction and growth, (25) 59
feed restriction on egg production, (25) 56
feeding value of rapeseed oil meal, (25) 57
field beans, nutritive value of, (25) 348
food intake, effects of rearing treatment on, (25) 348
glycols, nutritive value of, (25) 383
gossypol, (22) 347
gossypol on eggs, (22) 335
hydrochloric or formic acid in, (24) 338
hypervitaminosis and bone deformities, (24) 321
influence on the semen production of roosters, (25) 315
in tropical countries, (22) 112
lactose in magnesium utilization, (22) 345
lysine and methionine, (22) 156
lysine on arginine metabolism, (22) 342
metabolism and growth rate, (24) 147
metabolizable energy of field beans, (24) 319
metabolizable energy intake, effect of ambient temperature on (25) 347
methionine requirement of layers, (25) 146
methionine isomers and hydroxy analog, (22) 31
methionine requirements for pullets, (23) 254
Mg and F, on bone calcification, (24) 323
nutrient restriction, (22) 335
of caged layers, (22) 157
nutrients, utilization of in young chicks, (25) 349
requirements of growing chickens, (25) 382
on mineral content of turkey poult, (24) 325
phase feeding, layers, (23) 254
protein effects on atherosclerosis, (24) 326
protein and energy requirements, (24) 334
protein evaluation, (23) 226
protein for egg production, (22) 155
quality of protein, (25) 64
rapeseed meal, (22) 217
rapeseed meal, nutritive value of, (25) 381
requirements for growth, (22) 335
selenium deficiency and vitamin E, (25) 53
Nutrition—*cont.*
soybean meal and nitrogen solubility index, (24) 322
sources of energy, (22) 157
soyabean meal substitutes, (25) 146
sulfur amino acids for broilers, (24) 63
tapioca meal, (22) 113
terephthalic acid feeding, (23) 59
thiamine derivatives, (24) 63
thiamine analogues, (25) 383
utilization of dicalcium phosphate, (22) 345
value of meat and bone meals, (25) 51
vitamin B_{12}, (22) 341
vitamin changes with energy, (25) 235
vitamin mineral mixtures for turkeys, (24) 337
W.P.S.A. committee report, (23) 46
zinc absorption, (22) 342
zinc deficiency, amino acids, (22) 344
zinc deficiency, histidine, soyabean meal, (24) 328
on plasma lipoprotein, (24) 338
prevention of leg defects, (24) 329
Nutritive value—
of chorella species, (23) 59
of energy sources, (22) 236

Parthenogenesis—
chicken and turkey, (23) 242
Performance—
of Leghorn pullets, (23) 53, 55
effects of hatching date, (23) 61
Pesticide residues in poultry products, (22) 194
Physiological response to temperature, (22) 140
Pigeons—
breeds, (22) 329
Pigeon liver—
fatty acid synthesis, (22) 336, 348
Pituitary—
liver xanthine dehydrogenase, (22) 340
Poultry costings—
NAAS scheme, (23) 255
Poultry feeding—
in Ghana, (25) 255
in Morocco, (23) 320
in tropical countries, (22) 112
Poultry handbook, (24) 245
Poultry health—
regional USA research, (25) 124
Poultry house ventilation, (25) 223
Poultry industry—
in Africa, (23) 151
Australia and USA, (25) 24
in Spain, (25) 223
Poultry manure, (25) 202
Poultry rations—
use of tapioca meal, (22) 113
Poultry products research in USA, (25) 15

Poultry Research Centre, (22) 139
Poultry—
1964 world market, (22) 51
production in Africa, (22) 146
products technology, (22) 330
progress in Nigeria, (23) 234
Poultry science instruction—
Mexico, (23) 321
Precipitin factor in chicken serum, (24) 330
Processing—
egg quality, (24) 337
Ptarmigans—
activity rhythm, (24) 330
Pullorum disease, (23) 53

Quail—
pantothenic acid requirement, (22) 45
Quail-chicken hybrids, (23) 50

Rapeseed meal for poultry, (22) 217
Research—
regional USA, (24) 231, (25) 322
Rous sarcoma—
susceptibility to, (22) 45

Safflower meal—
feeding value, (22) 238
Semen—
deep freezing preservation, (25) 59
storage and artificial insemination, (3) 11
Serum gamma globulin allotypes, (23) 50
Sex ratios—
effects of dam and sire, (24) 149
and hatching time, (23) 62
Sperm host glands—
endocrine control, (22) 343
Spermatozoa—
freezing point depression, (22) 234
in oviduct of hen, (22) 235
super cooling, (23) 59
temperature shock, (24) 61
Spermatogenesis, (24) 148
Symposia of egg marketing board, (23) 19
Strontium—
absorption and depletion, (22) 338
determination of, (22) 338
Temperature—
environment—
for hens, (22) 126
for adult fowl, (22) 140
Testosterone—
biosynthesis in testes, (24) 328
Thymus, (22) 25
Thyroiditis—
hereditary autoimmune, (24) 323
Turkeys—
Beltsville Small White, (23) 32
binucleated red cells, (22) 44
blood groups and performance, (22) 46
body parts and muscle weights, (25) 51
breeders, sinusitis, (24) 318
compensatory growth, (24) 315
foods eaten, (23) 58
serum fatty acids, (22) 349

USA exports 1964, (22) 39
US poultry meat products—
West European trade interest in, (25) 343

W-chromosome, (22) 46
World-trade—
poultry and eggs, (23) 51; (4) 150
W.P.S.A.—
constitution, (25) 46i
council reports, (22) 323; (00) 44
European Breeders' Conference, (24) 247
European Federation, (23) 256
financial statements, (22) 159; (23) 215; (24) 198; (25) 98
executive report, (4) 198
president, (23) 43
president's badge, (23) 167
report of president's committee, (23) 356
2nd executive meeting, (25) 266
3rd European Conference, (24) 153; (25) 46
membership, four different categories (25), facing p. 315

Yolk colour—
measurement of, (23) 54
Yugoslavia—
1968 symposium, (25) 61

INDEX OF AUTHORS

Volumes 22—25 (1966–69), Inclusive

Figures in parenthesis indicate Volume number, others Page numbers

ABBOTT, J. C., (23) 151
AGENOR, F., (23) 354; (24) 327
AGUDU, E. W., (25) 259
ALMQUIST, H. J., (22) 31
ANWAR, A., (23) 354

BEARSE, G. E., (22) 194
BIRD, H. R., (24) 309
BIXLER, R., (23) 321
BLACKWELL, R. L., (24) 158
BLOUNT, W. P., (24) 313
BOUWKAMP, (25) 331

CLAYTON, G. A., (24) 37
CLANDININ, D. R., (22) 217
COLES, R., (24) 7
CRAIG, F. R., (24) 141
CRITTENDEN, L. B., (24) 18
CUCKLER, A. C., (23) 237
CUMMING, R. B., (25) 24, 218

DAVTYAN, A. D., (25) 315
DAWSON, L. E., (25) 15; (25) 331
DICKERSON, G. E., (24) 106
DONOS, A., (23) 315

FREEMAN, B. M., (22) 140; (25) 99

GARNER, R. G., (25) 15
GHANY, M. A., (23) 336
GILBERT, A. B., (25) 239
GOODWIN, K., (22) 299
GREEN, D. F., (23) 237

HAMBY, M. K., (22) 316
HANN, C. M., (25) 135
HISLOP, R. I., (23) 133, 216

JAAP, R. G. (25) 140
JAFFE, W. P., (22) 25
JOHNSON, T. H. (25) 202
JOVER, F. P., (25) 223

KHEIR-ELDIN, M. A., (22) 336
KINNEY, T. B., Jr., (24) 300
